

Click the "Format" tab, then click "Wrap Text" in the Arrange group. Choose "Square," "Tight," "Through" or "Top and Bottom" if you want the image and your text to be separate. Choose "Behind Text" or "In Front of Text" if you aren't concerned with images and text overlapping each other.

Welcome to Gemini, your upgraded AI assistant from Google that can help you supercharge your creativity and productivity. Gemini can not only provide the hands-free help that you love from Google Assistant, but can go far beyond in conversationality and richness of the tasks it can help with

Gemini uses info from your devices and services to provide more customised and context-aware assistance. Gemini accesses certain system permissions and data (including through Google Assistant),

Road designations, also known as route numbers, are alphanumeric designations assigned by highway authorities to distinguish different roadways.

A systematic and structured ABCDE (airway, breathing, circulation, disability, exposure) approach should be employed by teams caring for unconscious patients
